

Hello, neighbors - here is the newsletter for March.

Cleaning of drains

The association has ordered drain cleaning for the entire property. The cleaning also includes cleaning the water traps. The cleaning will be performed v.15-16 in all apartments. It is a regular maintenance work which is important to prevent clogging and to extend the life of the drain.

You will receive a notification in your mailbox during the next week with information about which day they need access to your apartment. Appointments are not possible as they have to work from the bottom up in the house.

New code

After a recent break in in the garage, we see it as necessary to introduce a new code for the door and to change the code for the garage door more frequently (used primarily by M).

There will be a new code from April 1 st. The code has been sent via e-mail.

Remote controls for garage door

We have updated our remote controls for the garage door and blocked the controls we could not trace to a specifik person. If, contrary to expectation, you can not enter the garage door with your remote control, contact Jan Holmgren 0706304300 / jan@etaget.se and he will replace it immediately with a new one.

Container for bulky waste

At the end of April, there will be a container outside the building where we can throw our bulky waste. We will return with more information on exact dates etc. as soon as possible.

Etaget March
